SKILLS

Languages: C, C++, Java, Python, Solidity, HTML, CSS, JavaScript.
Frameworks & Libraries: React.js, Node.js, Express.js, Flask.
Developer Tools: Wireshark, Weka, GitHub, VS Code, Firebase, MySQL, MongoDB, Docker.
Operating Systems: Linux, Microsoft Windows.
Coursework: Data Structures, Object-Oriented Programming, Operating Systems, Computer Organization & Architecture, Database Management Systems, Digital Forensics.
Soft Skills: Leadership, Teamwork, Problem-Solving, Communication.

EDUCATION

- Bachelor of Technology- Information Technology** *Sep 2022 - July 2026*
Jaypee University of Information Technology *GPA: 7.2*
- Senior Secondary School (Class XII)** *April 2021 - March 2022*
Aryan Public School, H.P Board, Joginder Nagar, Himachal Pradesh *Percentage: 80*
- Secondary School (Class X)** *April 2020 - March 2021*
Aryan Public School, H.P Board, Joginder Nagar, Himachal Pradesh *Percentage: 88*

PROJECTS

- Online Book Store** *April 2025*
A full-stack library platform allowing users to browse, read, and securely download books with real-time assistance.
 - Tech Stack: **Java Servlets, JSP, Java Sockets (TCP), JDBC, MySQL, HTML, CSS**
 - Built a robust, database-integrated web app managing **1,000+ book entries** with sub-300ms search response time.
 - Designed secure user authentication and role-based access for **100+ registered users**, featuring session tracking.
 - Developed a real-time admin-user chat interface via Java Sockets over TCP to support live query handling.
 - Created an offline-access PDF download module with reliable file delivery and minimal latency.
 - Hosted the platform with version control via GitHub, sustaining **99.9% uptime**.
- Hackathon Registration System** *Jan 2025*
Built a centralized web platform for managing and registering hackathon participants with ease.
 - Tech Stack: **Python, Flask, HTML/CSS, MySQL**
 - Processed **500+ registrations** across events, enabling smooth participant tracking and data handling.
 - Designed an intuitive interface using Flask, leading to a **30% increase in user engagement** through clean navigation and efficient UX.
- Blockchain-Based Degree Verification System** *Nov 2024*
Created "CertiChain," a decentralized platform to validate academic degrees and eliminate certificate fraud.
 - Tech Stack:** Solidity, Ethereum (Truffle, Ganache), React.js, Web3.js, IPFS, Pinata, MetaMask, JavaScript.
 - Programmed smart contracts to issue and revoke **100+ blockchain-backed degrees**, eliminating manual verification overhead.
 - Integrated IPFS/Pinata for immutable storage, ensuring **99.9% data availability** and tamper-resistance.
 - Introduced QR-code based verification, reducing institutional validation time by **40%**.
 - Leveraged insights from **30+ blockchain publications** and Self-Sovereign Identity (SSI) models to reinforce data privacy and scalability.

CERTIFICATIONS

- Image Compression Certification – Infosys Springboard**
- Python Foundation Certification – Infosys Springboard**
- Database Management Systems Certification – Infosys Springboard**
